# Getting Tested for Breast Cancer Genes

**Also, learn about screening tests that can help find breast cancer at its earliest stages.**

About 1 out of 7 women living in Boulder County will be diagnosed with breast cancer at some point in their lives. Statistics like this have prompted a growing conversation around breast cancer prevention and screening:

- Who should be tested for inherited breast cancer genes?
- What screening tests can make a difference?
- At what age should women begin having regular mammograms?

Come hear the latest recommendations about testing for genes that can cause breast cancer and screenings that can help find cancer at its earliest stages.

**Speakers** Katie Storm, MS, CGC, Rocky Mountain Cancer Centers  
Paul D. King, MD, board-certified radiologist

**When** Tuesday, Oct. 21, from 7 to 8 p.m.

**Where** East Boulder Community Center, 5660 Sioux Dr., Boulder

**Reservations required:**
