Averting the preventable killer - colon cancer

Did you know that colon cancer is the second leading cause of cancer-related deaths in the U.S. and the third most common cancer in men and women? Each year, more than 50,000 Americans die of colon cancer. That's one life lost every 10 minutes. However, the majority of these deaths could be prevented through early screenings.

Come hear a board-certified gastroenterologist discuss a screening that detects and even prevents this cancer. He'll also describe healthy lifestyle choices that can improve digestive and colon health.

Speaker Peter Kaye, MD, FACP, of Gastroenterology of the Rockies

When Tuesday, March 10, from 7 to 8 p.m.

Where The Dairy Center for the Arts, 2590 Walnut St., Boulder
(Main entrance is located on 26th Street. Parking lot entrance is on Walnut Street.)

Reservations required: bchlectures.org/coloncancer • 303-441-0580
